NORTH CAROLINA BOARD OF EXAMINERS
FOR ENGINEERS AND SURVEYORS

POLICY

Title: **STREAM RESTORATION SERVICES**

Policy Number: BP-1005-2 Rev 1

Status: Draft____ Date Originated: 12/4/2009 By: David L. Pond, PE
For Approval____ Rev. No.: _____
Final X Referred to Engineering Committee Date 12/9/2009

Date for Board Approval: 5/13/10 Date Adopted: 5/13/10
Date for Board Approval: Rev. 1 12/11/13 Date Approved: 12/11/13
Date to be Reviewed: 2016 Date Reviewed: 12/11/13

Category(s): Engineering, Surveying

Keywords: Stream Restoration Services

Certain Stream Restoration Services, to include the Stream Restoration Plan (Engineering Report), Hydrology Modeling, Channel Design and Plans/Specifications, are within the practice of engineering in G.S. 89C-3(6) and must be done by a licensed Professional Engineer (PE). The topographic and location surveys for design and as-builts are within the practice of land surveying in G.S. 89C-3(7) and must be done by a licensed Professional Land Surveyor (PLS). A PE can do topographic surveys incidental to his/her engineering projects provided all requirements in the "Engineering Surveys Policy" are met. No individual or company shall engage in such activities unless properly licensed with the Board.

The following Stream Restoration Services are not considered within the practice of engineering: Soils Evaluation, Planning Studies, Wildlife/Habitat Studies, Regulatory Interaction, Wetlands Delineation (mapping must be done by PLS), Environmental Studies, and Monitoring Plans (the as-built elevations, location data, mapping, placing of monuments and annual monitoring cross sections must be done by a PLS).
